

TERAMETANANO-4

Lecce (Italy) 27 – 31 May 2019

Terahertz Emission, Metamaterials and Nanophotonics

TERAMETANANO is the International Conference joining the areas of nanophotonics and metamaterials, with special attention to light-matter coupling from visible to terahertz frequencies.

KEYNOTE SPEAKERS

Natalia Berloff – University of Cambridge

Jerome Faist – ETH Zürich

Jonathan Finley – TUM Munich

Sven Höfling - Würzburg University

Atac Imamoglu - ETH Zurich

Christoph Lange - University of Regensburg

Franco Nori - RIKEN Institute

Peter Rabl - Technische Universität Wien

INVITED SPEAKERS

Mete Atature - University of Cambridge

Jeremy Baumberg - University of Cambridge

Simone De Liberato - University of Southampton

Antonio I. Fernández-Domínguez - Universidad Autónoma de Madrid

Stéfan Kéna-Cohen - Polytechnique Montréal

Dmitry Krizhanovskii - Univ. Sheffield

Timothy Liew - Nanyang Technological University

Vinod M. Menon - University of New York

Alexander Poddubny - ITMO University

Ronen Rapaport - Hebrew University of Jerusalem

Maxime Richard - CNRS, Université Grenoble Alpes, Institut Néel

Alessandro Tredicucci - University of Pisa

Richard Warburton - University of Basel

Qihua Xiong - Nanyang Technological University - Singapore

ELEVATOR PITCH competition for the best posters

LOCAL ORGANISING COMMITTEE

D. Sanvitto, M. De Giorgi, V. Ardizzone

L. De Marco, D. Ballarini, L. Dominici, G. Gigli

Deadline for Abstract Submission: February 15th, 2019

CONTACTS:

Milena De Giorgi, Vincenzo Ardizzone
